TDT Plumbing

Better than a Repipe...without Destroying Walls!

Pipe Restoration

MEMORIAL CITY PLAZA Houston, TX

The Memorial City Plaza is a 12-story, affluent commercial office building located in Houston Texas.

THE PROBLEM:

The office building is suffering from failing galvanized pipes that restricted water flow, expelled rust-colored water and were engrossed with pinhole leaks due to extensive corrosion throughout the system. The building was 100% occupied and a complete plumbing re-pipe was not feasible or operationally possible without extensive downtime and temporary displacement of building occupants..

THE SOLUTION:

Memorial City Plaza's managers and engineers determined the best long-term solution for their demanding project was in-place pipe restoration using the ACE DuraFlo[®] e-Pipe epoxy coating system. TDT Plumbing, one of the nation's most experienced ACE Duraflo[®] franchises was selected to manage the project.

By choosing TDT Plumbing and the ACE DuraFlo[®] System, Memorial City Plaza selected the best possible solution to address the failing plumbing system, return maximum flow, and extend the system's usable life. The entire job was performed and installed while retaining 100% building occupation.
